

**RAINA INDUSTRIES
PRIVATE LIMITED**

**Competence in Advanced Green
Building Materials**

Raina Industries Private Limited

- Established on 07.11.2014, in Mumbai, India
- Motivated by
 - Made in India initiative of Hon PM Modi
 - Made in Maharashtra initiative of Hon CM Fadnavis
- Roots in state of the art technical textiles research from Germany
- An innovation driven company pioneering the use of Textile Reinforced Concrete (TRC) solutions in India
- In FY15-16, completed first projects in two different market segments
- In FY16-17, got invited to join a German Incubator. Increased the turnover by over 400% from year before

Indian construction projects suffers from regulation and financial implications

Construction materials **not aligned to Green Building norms.**

RERA punishes delays financially. Delays in project execution due to faulty design and planning

Unavailability of skilled labour on site leading to substandard quality work

Solutions at Raina Industries

Non-ferrous prefabricate materials due to its inherent weight, strength and sustainability advantages

On time project delivery by collaborating with design teams right at the project start and the use of **precast/ prefabricated construction techniques**

Training and execution for high quality manufacturing and installation

Building Sector in India

\$40.2 Bil

Building and Construction
Market in India

11%

Industry Growth Rate

\$8.15 Bil

Scope for Precast
Technologies

15%

Net Margins
